KABALEBO NATURE RESORT HOTEL

5 day tour

Pre-conference tour: June 3rd till June 7th 2008

Post-conference tour: June 14th till June 18th 2008

The area

In the mid-west region of Suriname, in the middle of our exceptionally pristine and uninhabited Amazon rainforest, you will find Suriname's latest most exclusive nature-accommodation: Kabalebo Nature Resort.

Kabalebo is a true paradise for nature lovers and is completely uninhabited, which is the reason for its remarkable biodiversity. This part of Suriname is home to many wild animals such as deer, pingo and pakira (wild boar), capybara, tapirs and wild cats such as jaguars and puma.

The Kabalebo River is well-stocked and fishermen are guaranteed a great catch of anyumara (*Hoplias macrophtalmus*) or red tale catfishes (*Phractocephalus hemiliopterus*). Unique for Suriname is that 'catch and release' is applied during fishing trips. It is also forbidden to hunt or collect plants or animals. So the original state of the pristine rainforest remains.

Flowers, plants and trees contribute to tropical nature in an enchanting way. Opposite the lodge lies Misty Mountain, rising 500 meters into the air. The clear river, the silence and pureness give Kabalebo an unmistakable character, which you won't find somewhere else in Suriname! The silence is interrupted only by the sound of the many birds. You can see many of these species such as Green Ibis, Kingfishers, Harpy Eagles, Macaw's, Humming-

birds, Toucans, Parrots and Herons.

Transportation

The nature park can only be reached by a airplane. The flight takes about 75 minutes.

Accommodation

The Kabalebo nature resort hotel, situated next to the airstrip, has 10 twin-bedded hotel rooms with air conditioning. All hotel rooms have a private bathroom, toilet and shower with warm and cold water. The spacious veranda is a lovely place to linger.
